### **DETAILED ACTION**

This is a first office action for serial number 09/977721, entitled Mechanism for Improving the Sealing Function for a Slide Out Room of a Recreational Vehicle, filed on October 15, 2001.

#### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: In regards to claim 1, the limitation "a mechanism" lacks antecedent basis, because within the specification there is a drive mechanism and several different latching mechanisms, it is unclear which mechanism the applicant is referring to. Until there is further clarification on this limitation, the examiner will interpret the claim accordingly.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Cooper, US patent # 5,237,782.

Cooper discloses the claimed invention a recreational vehicle (5) having a main room and an expandable room (10) movable relative to the main room, a sealing

member (102) positioned between the main room and the expandable room (figures 5 and 6), and a mechanism ("70" – interpreted as a drive mechanism) to move the relative position of the sealing member and a sealing surface (108, 110) of the recreational vehicle.

### ***Conclusion***
